

Grading Program Py

CS344 – Benjamin Brewster

This document details how to grade Program Py.

How to Get Student Submissions and Upload the Grades

Once you have finished grading the assignment, upload the score to Canvas in this manner:

- 1) Go to Canvas in your web browser of choice.
- 2) Click on Assignments on the left menu.
- 3) Click on “Program Py – Python Exploration”.
- 4) In the upper right corner, click on SpeedGrader.
- 5) Pick the name of the person you’re grading, above. Note that you can use the left and right arrows, and the drop down list, to select between students.
- 6) Once you’ve chosen a person, check in the upper right that the LATEST version is selected. Read their comments below.
- 7) Download their file by clicking it in the list on the left, placing it on to os1 (where all grading happens). Follow the instructions below to assign a grade (in points).
- 8) In order to commit the grade to Canvas, come back to this assignment, and enter the point value in the Assessment field on the right, in the middle. Then:
 - a. If the student lost points, record the reasons why in the Add a Comment Field. Note that this assignment is worth either 32 or 0 points, perhaps with the reduction of a late penalty. No resubmission is possible with Program Py.
 - b. If the assignment was late by more than an hour past the due date, it will be marked as late. Please review the Syllabus late policy.

Once you have generated the final points value, adjust it downwards, if necessary, according to the late percentages given above.

How to run the Grading Tests

Here is the process:

- 1) Read the Assignment as give on Canvas.
- 2) Run the student’s submission by starting a bash prompt on os1 and then typing:

```
python mypython.py
```

Note: the student’s code may only work if you instead use this line:

```
python2.7 mypython.py
```

or this line:

```
python3 mypython.py
```

All of these are acceptable.

- 3) If the student's assignment passes all the requirements listed in the Program description, it receives the full score, 32 points. If the assignment does NOT have all of the parts listed, it receives 0 points. No resubmission is possible for Program Py.

Grading Criteria

There are a total of 32 points available for this program. My philosophy is that we should grade somewhat generously: give the student the benefit of the doubt, where possible.
